

Sprint #2 Report
FlixForum
2/14/2023

Actions to stop doing:

- Waiting on one component and start working on it until another is completely done
- Updating the main branch/ letting people know when it has been updated so people can pull from it

Actions to start doing:

- communicate more with each other to keep everyone on the loop of what is being completed and what needs to be done.

Actions to keep doing:

- keep doing research, keep learning about the software
- helping each other figure out the software and design choices to make
- keep having group work sessions where we merge and update each other and help each other with tasks

Work completed:

- created a search bar that takes in the input from user
- created a login/logout button
- created a forum page that users can submit a post from if they are logged in, if they aren't logged in then the submit button will take them to the login page
- the db is set up so that when the users post, the posts are saved under the correct forum
- created a carousel of tv shows on the main page where if they click on it, it takes them to the forum page

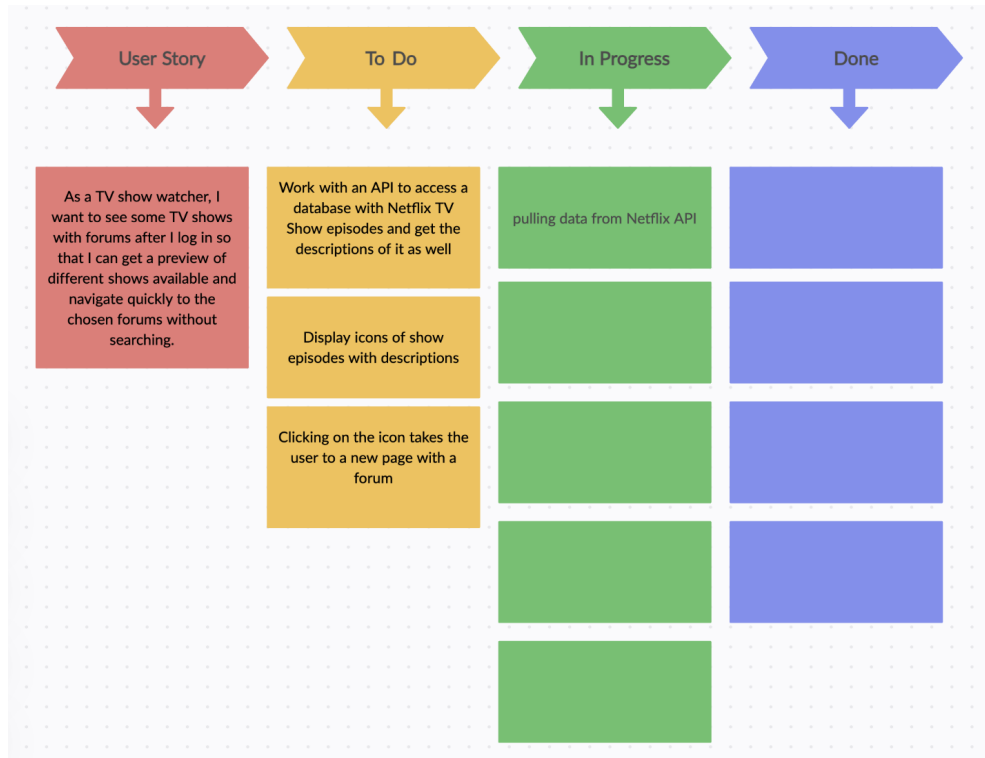

Work not completed:

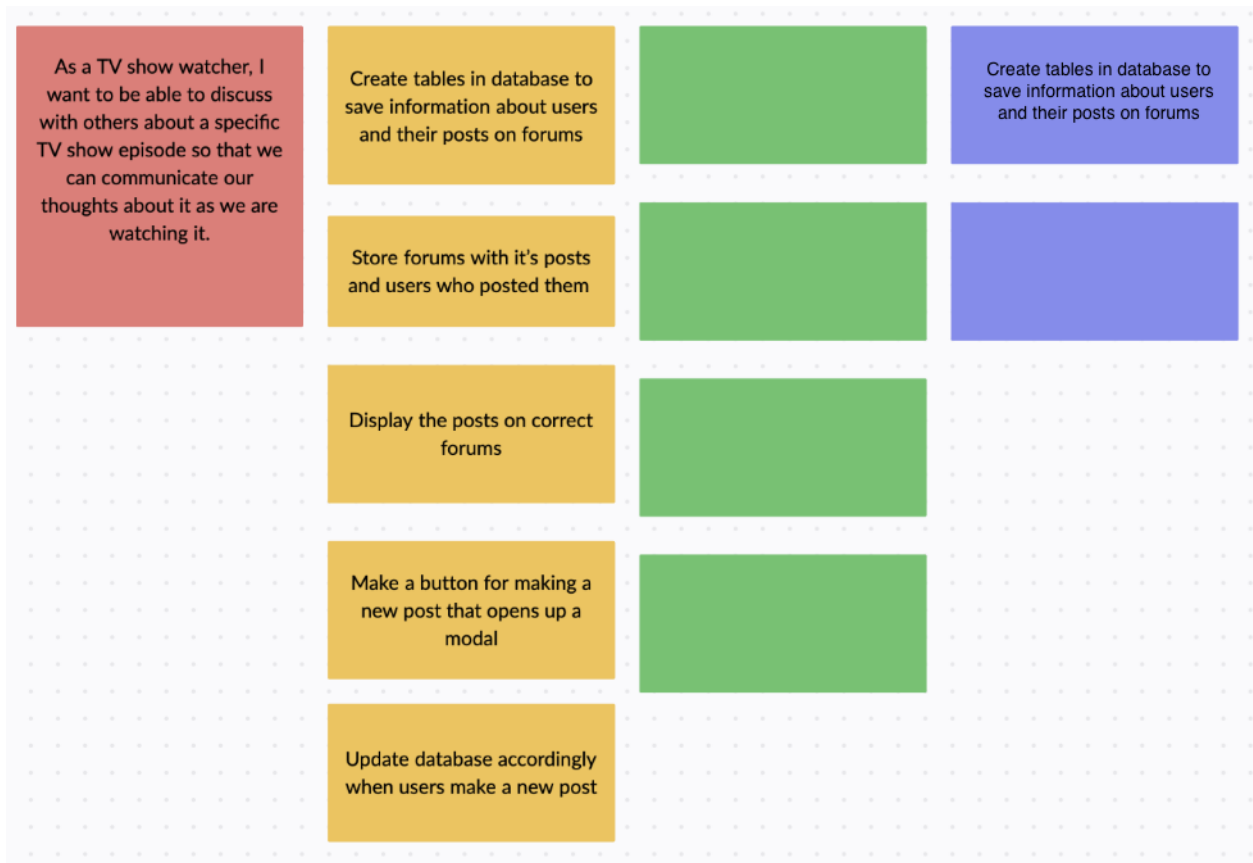

- when clicking on the tv show card, it's not sending to the list of seasons and then to the list of episodes yet
- haven't merged the forum db logic with the carousel from the main page because the data being passed isn't solidified yet

Work Completion Rate:

- The total number user stories completed : $\frac{2}{3}$
- Estimated ideal work hours completed:
 - user story 1 : 9
 - user story 2 : 4
 - user story 3: 8
- Total number of days during the prior sprint: 2 weeks
- user stories/day and ideal work hours/day: 3 user stories/day and 3 ideal work hours/day
- average use stories/day: 3 user stories/day
- average idea work hours/day figures: 5 hours/day
