

Sprint #3 Report
FlixForum
2/28/2023

Actions to stop doing:

- Not communicating enough
- Waiting on other parts to start on a component

Actions to start doing:

- communicate more with each other to keep everyone on the loop of what is being completed and what needs to be done.

Actions to keep doing:

- keep doing research, keep learning about the software
- helping each other figure out the software and design choices to make
- keep having group work sessions where we merge and update each other and help each other with tasks

Work completed:

- Homepage UI (scroll left/right, added search icon/image, search bar UI, added flixforum logo on homepage, login/register page)
- Pulling data from designated forum page
- UI for forum page (comment box UI for displaying on forums page)
- Forums can be reached using search bar
- Static like button (not using DB currently and not attached to a specific post)
- Added new columns in the database in order to store the likes and rating information
- displays posts in correct forum

Work not completed:

- like button on posts attaching to posts
- rating for show

Work Completion Rate:

- The total number user stories completed : $\frac{1}{2}$
- Estimated ideal work hours completed:
 - user story 1 : 10
 - user story 2 : 4
- Total number of days during the prior sprint: 2 weeks
- user stories/day and ideal work hours/day: 2 user stories/day and 3 ideal work hours/day
- average user stories/day: 2 user stories/day
- average idea work hours/day figures: 4 hours/day

User Story	To Do	In Progress	Done
------------	-------	-------------	------

As a TV show watcher, I want to be able to discuss with others about a specific TV show episode so that we can communicate our thoughts about it as we are watching it.	Store data from new posts using the correct forum data from forum pages.	Pass data from API calls to forum page	Create tables in the database to save information about users and their posts on forums.
	Display the posts on correct forums once the user makes a new post.		Store forums with its posts and users who posted them.
			Update database accordingly when users make a new post.
			Make a button for making a new post that opens up a modal
As a person interested in TV shows, I want to be able to look at the most popular opinion of the show to gauge the overall consensus of the show episode. I also want to be able to agree with other people's posts.	Create tables in the database that store likes and dislikes on specific posts.		
	Make thumbs up and down buttons to update these values.		
	Display likes and dislikes under posts.		

Burnup Chart:

Completed, Expected Completion and Total Story Points
