

**Sprint 3 Plan**  
**FlixForum**  
**February 15th 2023**

**Goal:** Allow registered users to and make and like posts under each forum. Also, have icons on the main page that the user can click on that will route to the forum corresponding to the specific TV show.

**Sprint 3 Higher Level Goals:**

1. This web application should allow for people to be able to see icons for different discussion forums for TV show episodes that they can click and navigate to.
2. Users should be able to post under the forums.
3. Display search query result on a new page for the user to click

**User Story 1: (21)** As a TV show watcher, I want to be able to discuss with others about a specific TV show episode so that we can communicate our thoughts about it as we are watching it.

**Tasks:**

1. Store data from new posts using correct the forum data from forum pages
2. Display the posts on correct forums once user makes a new post

**User Story 2: (13)** As a person interested in TV shows, I want to be able to look at the most popular opinion of the show to gauge the overall consensus of the show episode. I also want to be able to agree with other people's posts.

**Tasks:**

1. Create tables in the database that store likes and dislikes on specific posts
2. Make thumbs up and down buttons to update these values
3. Display likes and dislikes under posts

**Team roles:**

Saki Yokokawa : Developer

Gavin Poley : Developer

Ryan Wang : Developer, Scrum Master

Khin Yone : Developer, Product Owner

Julia Tober : Developer

**Initial Task Assignment:**

Saki Yokokawa : Push and pull data from the database in order to make and store posts

Gavin Poley : Create pages for search with a query based on user search, and seasons, episodes

Ryan Wang : Push and pull data from the database in order to track thumbs up and down

Khin Yone : Push and pull data from the database in order to make and store posts

Julia Tober : Push and pull data from the database in order to track thumbs up and down and also finish the search result query stuff

User Story	To Do	In Progress	Done
As a TV show watcher, I want to be able to discuss with others about a specific TV show episode so that we can communicate our thoughts about it as we are watching it.	Store data from new posts using the correct forum data from forum pages.	Pass data from API calls to forum page	
	Display the posts on correct forums once the user makes a new post.		
As a person interested in TV shows, I want to be able to look at the most popular opinion of the show to gauge the overall consensus of the show episode. I also want to be able to agree with other people's posts.	Create tables in the database that store likes and dislikes on specific posts.		
	Make thumbs up and down buttons to update these values.		
	Display likes and dislikes under posts.
