

Sprint 1 Plan
FlixForum
January 18th 2023

Goal: Having a login page for users to register or sign up. Have a main page where there are a selection of TV show episodes with short descriptions so that users can click and navigate directly to the corresponding forums.

Task listing:

User Story 1 (8) : As a TV show watcher, I want to be able to communicate with other people and be a part of a community.

Task 1: Create a login page modal on a currently blank home page (Time estimate: 2hrs)

Task 2: Allow a user to sign up, ask for email, password, and username. Save information to the database so they are able to sign in with the same account. (Time estimate: 5hrs)

Task 3: Allow a user to sign in by checking if their email address and password exists in the database. (Time estimate: 4hrs)

User Story 2 (21): As a TV show watcher, I want to see some TV shows with forums so that I can get a preview of different shows available and navigate quickly to the chosen forums without searching.

Task 1: Work with an API to access a database with Netflix TV Show episodes and get the descriptions of it as well. (Time estimate: 6hrs)

Task 2: Display icons of show episodes with descriptions. (Time estimate: 6hrs)

Task 3: Clicking on the icon takes the user to a new page with a forum. (Time estimate: 6hrs)
